Why is Every Colour Green?

Interpon's industry leading powder coatings are VOC free, recyclable during application and have been produced as part of a sustainable manufacturing process.

What's more they are proven to be more eco-efficient than many alternative coating products.

- No Volatile Organic Compounds (VOCs) in Interpon Powder Coatings
- No toxic heavy metals such as lead or chromium
- Almost no waste as any overspray is reclaimed, recycled or reprocessed
- Offer long term, durable protection reducing the need for replacement coatings
- Most Interpon powders have a lower ecological footprint than other coating alternatives

What Are You Saving?

By using sustainable Interpon powder coatings you save natural resources, CO₂ emissions and of course money. Take all of these environmental advantages, our desire to continually improve, provide a rainbow of colours and it's clear; with Interpon Powder Coatings, Every Colour Is Green.

The contents of this document do not form any part of a contract. Whilst all care has been taken in the preparation, no responsibility is accepted for the accuracy of the whole or any part and interested persons are advised to make their own enquiries and satisfy themselves in all respects. Fairview also reserves the right to make alterations without notice; please check details are current before specifying.

Colours displayed are a guide only; whilst every care has been taken to replicate colours these are not necessarily colour accurate with Interpon production standards under daylight conditions. Due to the nature of printing process some degree of colour and gloss level variation may occur. We recommend that you use production line colour swatches for final colour selection and approval.
